

*...And More Than Cabling*

## **Telephone and Paging Systems**

DataTel.US can provide and install new equipment or move your existing phone and paging equipment.

- **New Telephone Systems.** DataTel.US can provide your company with a telephone system to meet your needs now and grow with your business. Let us help you make the choice that is right for you.
- **With a Paging System from DataTel.US** you won't have to shout. We can give you a professional way to inform people in your organization when they have a phone call, a client, or when meetings are ready to begin.
- **When the bell rings** - DataTel.US is there. We have been designing, installing, and maintaining alerting systems in institutional, industrial, and specialized settings since 1975.
- **Moves, rearrangements, and changes.** Whether you're moving one person in your existing office, adding staff, or moving to a new location, DataTel.US can make the transition with you. We make your life easier by handling all aspects of your voice/data/paging system move.

## *We Do Structured Cabling...*

*You shouldn't have to worry about the wiring that connects you to everyone else in the office and the rest of the world.*

- **Our cabling is installed to published industry standards.** We use the most up-to-date standards published by the Electronic Industries Association and the Telecommunications Industries Association (EIA/TIA-568-B).
- **All cabling is tested.** We test all category 5, 5e, and 6 cabling to EIA/TIA requirements using the Fluke DSP-4300© cable analyzer. DataTel.US can also test to other standards at your request.
- **Once your cabling is installed, it's nice to know what goes where.** All cable runs are documented by DataTel.US using the Administration Standard for Infrastructure of Commercial Buildings (EIA/TIA-606). This means that we identify and mark every cable run and provide you with written documentation for future reference.

*Providing Quality Voice And Data Network Cabling At Competitive Prices.*

## *DataTel.US Serves*

- **We tackle the tough jobs.** Whether it's getting you back in service after a flood or a fire, or installing systems in difficult situations, DataTel.US employees are there for you. Our technicians have worked under some of the most adverse situations – and we understand the importance of communications to your business.
- **Independent third party testing, certification, and documentation.** DataTel.US can inventory and test your existing cabling – often finding small issues that may cause expensive problems for your business.

*Our service doesn't stop once the last cable is in.*

- **Maintenance contracts for any network.** Based upon your needs and the condition of your existing system, DataTel.US offers maintenance contracts customized to your network.
- **Neatness counts.** Our techs aren't afraid of a broom or vacuum. Our guarantee: we'll leave the work area in better condition than when we started the job.
